

## **New Unified Field Theory**

Einstein said, “There are only two ways to live your life: One is as though nothing is a miracle. The other is as if everything is. I believe in the latter.” And from David Bohm, “The great strength of science is that it is rooted in actual experience. The great weakness of contemporary science is that it admits only certain types of experience as legitimate.”

In summary in this new theory, we propose the existence of diallel-field lines that emanate from any entity – affording its connection and communication channel with any other entity. So far we have demonstrated the existence of these diallel-field lines and that they have quantum states. Einstein gave us four dimensions with his (special and general) theories of relativity. This new theory requires at least a fifth dimension. We have also shown experimental evidence of the existence of this fifth dimension.

## **The Magic of Seven**

As is known, there are seven basic electron shells that provide the fundamental quantum states for the electrons making up all of the known elements. These, nominally, have spherical symmetry. The diallel-field lines, nominally, have cylindrical symmetry and seven communication channels. Interestingly, there are seven spectral bands in these communication channels. They may be divided up in generic terms as follows: 1) the communication band (TV, radio, satellite, etc.); 2) the molecular band (coming from quantum transitions outside the nucleus); most of the visible light from the sun is in this band; 3) the nuclear band (coming from quantum transitions inside the nucleus) – a nuclear blast is a manifestation of this band; 4) the creation and/or annihilation band (where  $E = mc^2$  as matter and light convert with the emission and/or absorption of cosmic rays); 5) this is nominally the gravitational-field band; 6) this is the band used for mind-to-mind, mind-to-object, mind-to and from-God, ESP, etc.; 7) this is the band used by our great-loving Creator to bring about the grand harmony we see in the heavens and the earth. Bands five, six and seven are not limited by space and time and the velocity of light.
